HOMEPAGE

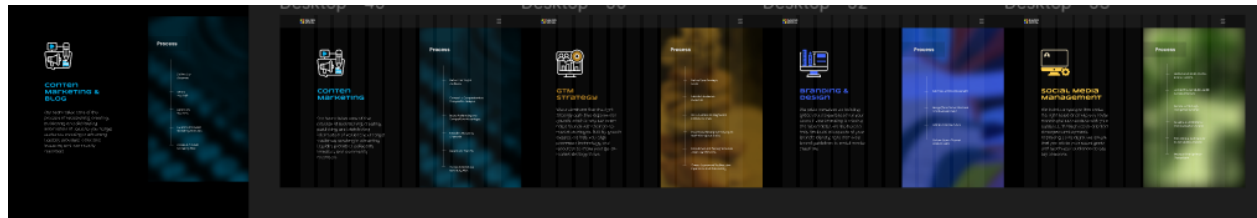

Hero section

typing animation needs to be fixed reference will be shared

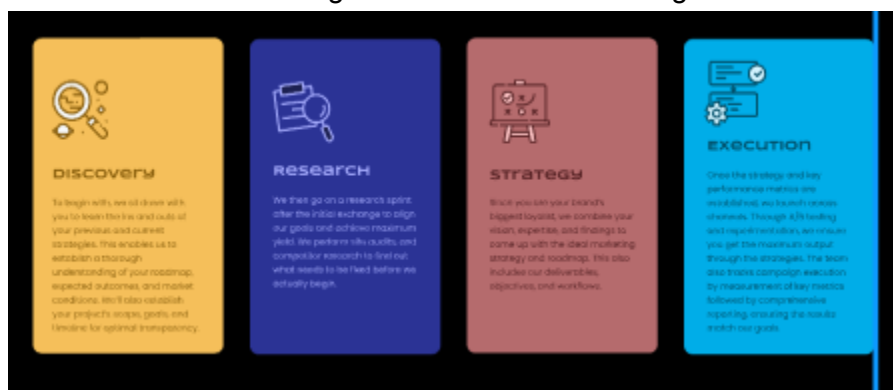

Service section

Add this section and replace with older one the reference will be shared

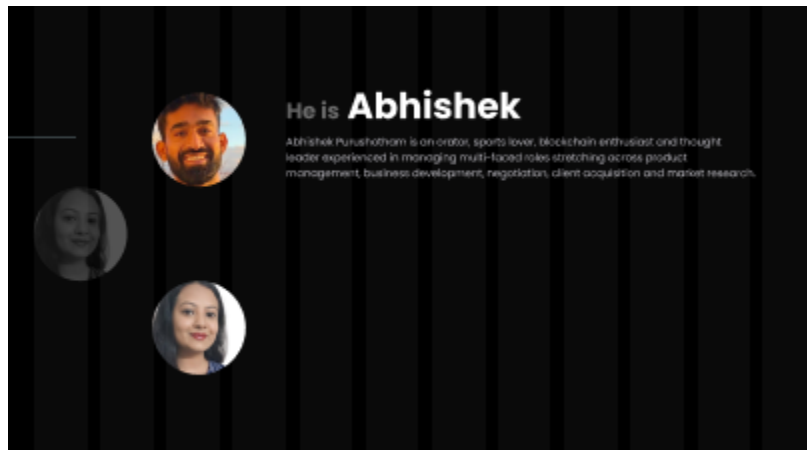

Add this section and replace old one the scroll animation would be same from right to left just the cards will flow in straight line remove that moving effect from cards

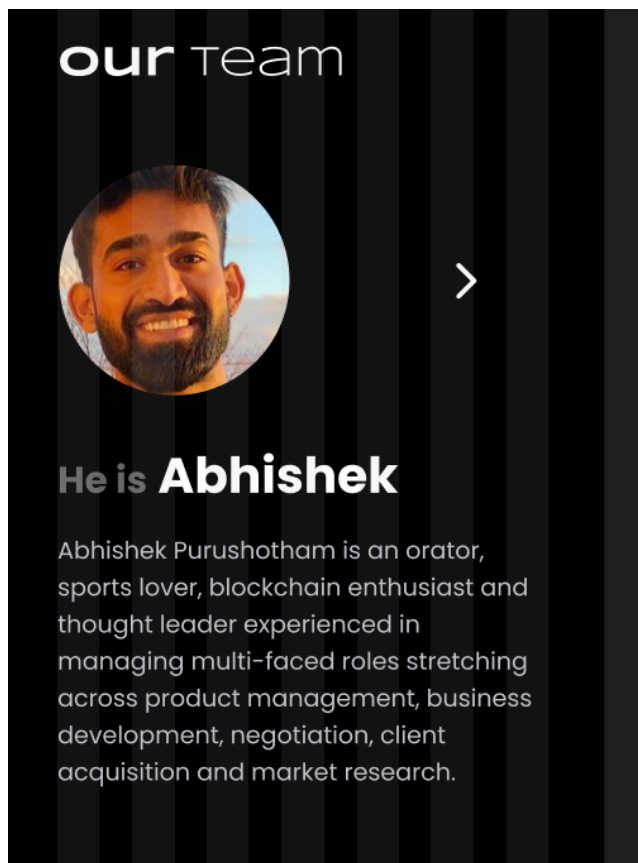

ABOUT US

Team Section

This Section Needs to exactly same in this layout and animation would be proper as and would be fit in this layout

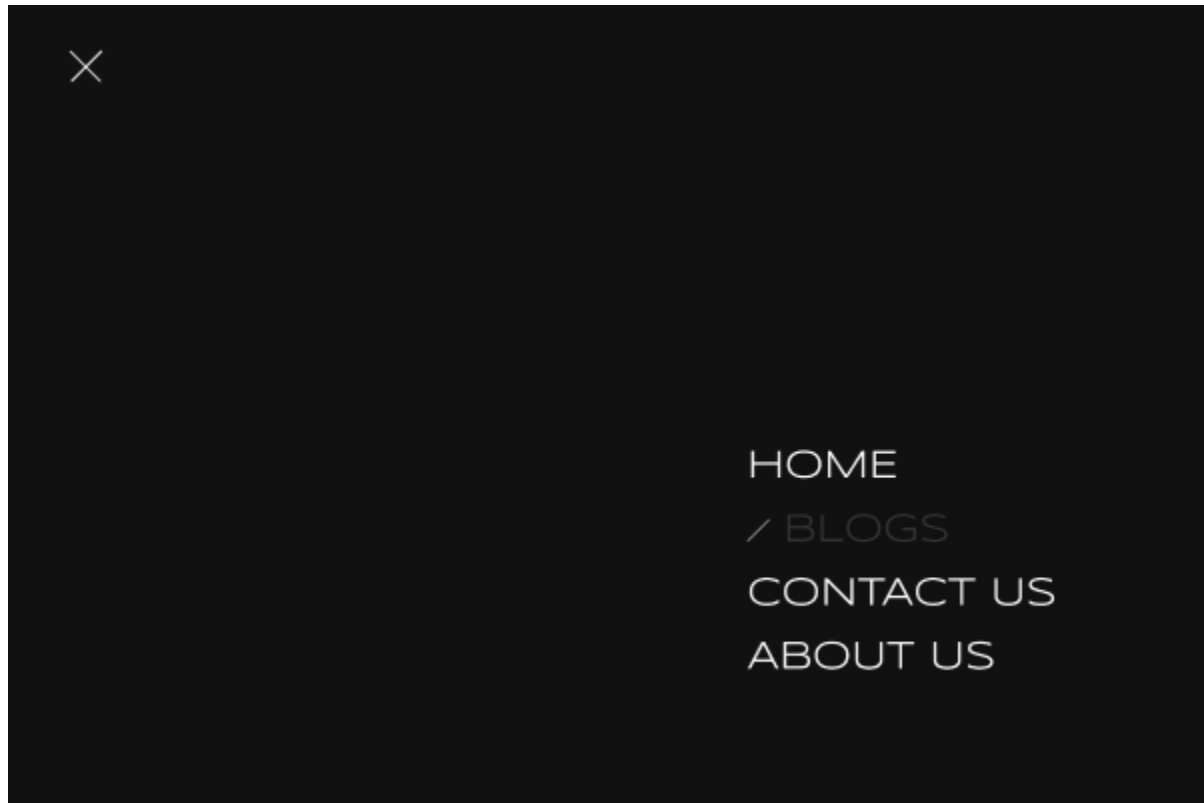

On Mobile version this section should be the slider like below image

MENU

It should be look like this

Connect the form to this mail: info@saltedsocial.com

All response should be go there

General points

- All the fonts should be exactly like figma file their size, weight, transformation, line height all should be same
- I need the each and every component, layout and design should looks same as design file their height size width alignment all should be same on all devices such as mobile desktop tablet check figma file for reference
- The Text Stagger animation needs to be fixed I'll share the reference it should loads smoothly when it triggers on screen without any glitches
- Website should load faster
- Don't make any unnecessary changes in code or animation which is not here
- Website should have visual harmony and should be have balanced view if u see now the scroll and entry and exit of component is not smooth make it smooth use any transition like fade in so it should balance the visual
- I have covered here all major changes looked into it if any left check related to layout alignment
